EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. This communication is an Examiner's reasons for allowance in response to application filed on March 10, 2004, assigned serial 10/797,330 and titled "VEHICLE-MOUNTED APPARATUS AND GUIDANCE SYSTEM".

2. The following is the Examiner's statement of reasons for the indication of allowable subject matter:

a. After carefully reviewing the application in light of the prior art of record and the searches of all the possible areas relevant to the present application, a set of related prior art references has been found, but those prior art references are not deemed strong to make the application unpatentable. Thus, it is found that the application is now in condition for allowance.

b. Although the prior art disclose several claimed limitations, none of the references teaches a vehicle mounted apparatus and system which includes a determining means for determining a movement of the vehicle on the basis of the vehicle sensor signal inputted from a sensor signal input means, a guidance information acquiring means for obtaining guidance information from an external apparatus through a communication apparatus mounted on the vehicle, an information selecting means for selecting guidance information obtained by the guidance information acquiring means, and an output means for outputting guidance information selected by the information selecting means (claims 1, 6, 11 and 12). Also, neither references teaches the determining means determines a vehicle movement expected to enter or expected to leave in the case of recognition of at least one of traveling at a predetermined speed or lower, a change in traveling direction to a predetermined direction and an exhibition of a turn signal in a predetermined direction (claims 2 and 7).
